

NAVNEETH PATNAIK

Aspiring Data Analyst | Analytics, BI & Data-Driven Decision Making

India | +91 6304763942 | navneethptnk123@gmail.com

PROFESSIONAL SUMMARY

Computer Science undergraduate skilled in Python, SQL, and Power BI, with hands-on experience across data validation, dashboard development, statistical analysis, and process automation. Experienced in turning large, messy datasets into clear, decision-ready insights across domains including finance, travel, and retail. Seeking to bring strong analytical rigor, data storytelling, and problem-solving skills to a data analyst role.

CORE COMPETENCIES & TECHNICAL SKILLS

- **Programming & Analysis:** Python (Pandas, NumPy, Matplotlib, Seaborn), Advanced SQL (Joins, Window Functions, Subqueries)
- **Visualization & BI:** Power BI, DAX, Microsoft Excel (Advanced Formulas, Macros, Pivot Tables), Data Storytelling
- **Data Quality & Engineering:** Data Validation & Reconciliation, Data Cleaning, ETL Processes, Data Wrangling, Microsoft Azure Fundamentals (AZ-900)
- **Big Data:** Hadoop, Apache Spark, Hive, HDFS, Distributed Data Processing Fundamentals, NoSQL (MongoDB)
- **Statistics & Modelling:** Exploratory Data Analysis (EDA), Hypothesis Testing, Regression Modelling, Trend & Risk Analysis
- **Domain Exposure:** Financial services, travel/aviation, and retail analytics; cross-industry reporting and data controls

CERTIFICATIONS

- Google Data Analytics Professional Certificate — Google (Coursera)
- Microsoft Azure Fundamentals (AZ-900) — Microsoft
- Microsoft Azure Administrator (AZ-104) — Microsoft (In Progress)

ANALYTICS PROJECTS

Trade & Transaction Analytics Dashboard | *Python, SQL, Power BI*

- Performed exploratory data analysis and data validation on large transactional datasets using Python and SQL to surface trends and resolve data-quality issues, improving overall data reliability by 25%.
- Engineered automated validation scripts in Python to catch missing and duplicate records prior to reporting, strengthening data integrity and audit-readiness — a workflow adaptable to any high-volume operational dataset.
- Designed interactive Power BI dashboards tracking volume, performance, and allocation trends, reducing manual reporting time by 15 hours weekly and enabling faster, evidence-based decisions for stakeholders.

Airline Network Profitability & Route Strategy | *Python, SQL, Power BI*

- Extracted, cleaned, and transformed 500K+ records using Python (Pandas) and complex SQL to identify performance drivers across a large operational network.
- Built forecasting pipelines and executive Power BI dashboards to support route-expansion and resource-allocation decisions.

Retail Store Expansion Strategy | *SQL, Pandas, Statistical Analysis*

- Evaluated demographic and competitor datasets using feature engineering and multiple regression modelling to support data-backed site-selection decisions.
- Translated statistical findings into clear, non-technical recommendations for stakeholder presentations.

EXPERIENCE

Freelance Data & Analytics Consultant — Remote

2022 – 2025

- Led requirement-gathering sessions directly with clients across multiple industries, translating business needs into clear technical specifications and data-driven solutions delivered on schedule.
- Acted as primary stakeholder point of contact across multiple concurrent projects, managing expectations, timelines, and scope through regular status updates.
- Automated recurring reporting through Python scripting, improving turnaround time and accuracy of deliverables shared with clients.

EDUCATION

B.Tech in Computer Science Engineering, GITAM University, Visakhapatnam

Aug 2023 – May 2027

Relevant Coursework: Data Structures, Database Management Systems, Statistics, Operations Research, Big Data Analytics
